ANUM KOUSAR

Junior Software Engineer

Scheme III, Rawalpindi | +92 349 5445560 | anumkousar552@gmail.com | linkedin.com/in/anum-kousar | github.com/anum-349

SUMMARY

Software Engineering Graduate from IIU Islamabad with hands-on experience across AI, full-stack, and Python development Backend-focused engineer who ships. Built REST APIs in Python (FastAPI, Django, Flask) and Node.js/TypeScript on PostgreSQL, deployed to AWS EC2 and Cloudflare, and paired them with React frontends. Also builds the AI layer: RAG search, NLP and an AI email copilot.

EDUCATION

Bachelor of Software Engineering *2022 – 2026*

International Islamic University, Islamabad | CGPA: 3.57 / 4.0

Relevant coursework: Data Structures, Databases, Operating Systems, Computer Networks, Machine Learning, Human-Computer Interaction, Mobile Application Development, Artifical Intelligence.

INTERNSHIP EXPERIENCE

Full-Stack Developer — Digiwaz, Remote *May 2026 – July 2026*

- Delivered 3 client web applications (Roomero, AutoSter, UrduPress) by building React interfaces and Python REST APIs backed by PostgreSQL and Supabase, live on cloudflare
- Shipped an AI-powered Email Copilot with summarization, AI-assisted replies and task and reminder management.

MERN Stack Intern — HH Tech Hub, Rawalpindi *Oct 2025 – Jan 2026*

- Built full-stack modules for a real-client LMS and ERP system; developed Express.js APIs consumed by a Next frontend.
- Participated in sprint cycles and code reviews, shipping production-ready features with clean, maintainable code.

Python & JavaScript Intern — Freelance Client Project, Remote *Oct 2024 – Dec 2024*

- Built Flask REST APIs covering authentication flows and data endpoints; resolved recurring bugs in Django app to improve system stability, and deployed the app on AWS EC2.

PROJECTS

AI Criminal Investigation Assistant (Final Year Project) *Jan 2026*

Python · FastAPI · Electron.js · NLP · ML

- AI desktop platform for bilingual FIR (First Information Report) analysis that generates investigative case leads and crime forecasts.
- SBERT-based case linking achieved 89.2% MAP; NER model reached 84.7% F1; usability testing (SUS) scored 81/100.
- FastAPI backend with an Electron.js desktop client, covered by automated pytest tests.

SmartDoc Retriever *Sep 2025*

Python · FAISS · RAG · LangChain

- Retrieval-augmented generation (RAG) document search system using FAISS vector indexing; improved query accuracy 35% over keyword search via embedding optimization.

Car Mechanic Platform *In Progress*

React · Django · PostgreSQL · REST APIs

- Implemented backend APIs, database integration, and role-based functionality for managing repair jobs and service history.
- Built responsive interfaces using React , with plans for future AI-powered vehicle diagnostics and maintenance recommendations.

TECHNICAL SKILLS

- **Backend:** Python (FastAPI, Django / DRF, Flask), Node.js, Express.js, TypeScript, REST API design, JWT / OAuth, RBAC
- **Data:** PostgreSQL, MySQL, MongoDB, SQLite, Supabase
- **Cloud & DevOps:** AWS EC2, Cloudflare, Docker, Git, pytest, Postman, Agile / Scrum
- **Frontend:** React, Next.js, Tailwind CSS
- **AI / ML:** RAG, LangChain, FAISS, SBERT, NLP, NER, Machine Learning

CERTIFICATIONS

- Machine Learning — NextGenLearners · Build with AI — Google Workshop · Python — HackerRank

Languages: Urdu (Native) · English (Advanced)
